Poles in the s-plane

Poles from ζ, ωn: $s = -\zeta\omega n \pm \omega n\sqrt{(\zeta^2 - 1)}$

```
-2.607 + j2.023
-2.607 - j2.023
```

Eigenvalues of A (state-space panel below):

```
-2.607 + j2.023
-2.607 - j2.023
```

× = poles, ○ = eigenvalues. They sit on top of each other because they are the same numbers.
